A detailed diagram of a 15-pin connector assembly. The assembly consists of a central block with 15 pins, numbered 1 through 15 from left to right. Above the pins, a label "JACK S97622 344-106" points to the top of the connector. Below the pins, there are two terminal blocks. The left terminal block is labeled "Terminal 5045-08A" and has pins 1 through 15. The right terminal block is labeled "Terminal 5045-07A" and has pins 1 through 15. The diagram shows the internal wiring and the physical layout of the components.
